Got a question about breastfeeding and medication?

- Unsure whether a mother can continue breastfeeding while taking medication?
- Does the leaflet in the box of tablets say they can’t be taken if the mother is breastfeeding?

Use the BfN Drugs in Breastmilk Info service - Evidence-based information from our small team of experienced, specialist pharmacists. Peer supporters also available who can support breastfeeding, pumping or stopping if needed.

Find more than 50 factsheets covering the most common issues affecting mums:
